FOREWORD

For the development of Ukrainian statehood, development of Ukrainian society gradual increase in legal activity of citizens, especially young people, making objectively necessary inclusion in the program of training courses in universities such as intellectual property. In terms of building in Ukraine a market economy and a democratic state, the main social value, as stated in its Constitution recognized the man, his life and health, honor and dignity, rights and interests. A person has the right to work, the use of advances in science, art and culture. In this regard, intellectual property rights, particularly industrial property rights, is of particular importance not only as a means of expression, but also as the commercial value. The results of creative activity appear in several ways: as an idea, as a scientific and cultural heritage society, information is material carrier and as property rights arising from the fact of their creation. Intellectual property developed in Ukraine under the doctrine of European intellectual property rights, taking into account the requirements of integration into international organizations and national circumstances and capabilities.

The purpose of discipline is aimed at profound mastering of knowledge that form the worldview of individual rights, legal thinking, legal application of theoretical knowledge in practical situations arising in the field of scientific, patent, intellectual property. An important component is the acquisition of independent work skills needed to further deepen and update legal knowledge that directly generates justice and legal culture specialist.

Research activities. Patent. Intellectual Property

The objectives of the course are: to introduce students to the basics of scientific work, patent and intellectual property; highlighting the role of scientific work, patent and intellectual property in the economic and cultural development of society; the use of international and national legal framework in the field of scientific work, patent and intellectual property; developing skills and abilities to implement research activities, and the acquisition, implementation and protection of intellectual property.

The course "Science. Patent. Intellectual property" is one of the final system of legal training students. It summarizes the acquired knowledge in their legal knowledge, distributes them towards understanding that the rules of scientific work, patent, intellectual property in modern conditions play an important role in the regulation of many areas of public life. The course has to target future professionals for a wide application of knowledge in their practice.

The manual is aimed at students of a technical college. Content and course material meets the scientific and methodological developments of Ukrainian scientists in recent years and takes into account the experience of reading course lecturer.

At the end of the book are examples of tests that allow students to control their level of theoretical training. Samples are examples of major problems and their solutions teach students to apply the law correctly in practice and focus in different situations.

The manual prepared by staff of the Department of Law of Odessa National Polytechnic University.
